

Amendments to the Claims

Please amend Claims 1, 2, and 4 to read as follows.

1. (Currently Amended) An original cover of an image reading apparatus, comprising:
 - a cover member for covering an original placed on an original stand; and
 - a hinge member having one end thereof pivotally supported by said cover member and having the other end thereof mounted on and pivotally supported by said original stand,wherein said cover member is biased in a direction in which said cover member is opened with respect to said hinge member and is further biased in a direction along parallel to an axis of a rotary shaft of said hinge member by a spring.
2. (Currently Amended) The original cover according to Claim 1, wherein said hinge member is pivotally supported by ~~another~~ an area other than an end portion of said cover member.
3. (Original) The original cover according to Claim 1, wherein said cover member has its pivotally movable range restricted with respect to said hinge member.
4. (Currently Amended) The original cover according to Claim 3, wherein at least one of said cover member and said hinge member is provided with a

restricting portion for restricting the pivotally movable range of said cover member in ~~said~~
the direction in which said cover member is opened with respect to said hinge member.

5 and 6. (Cancelled)

7. (Previously Presented) The original cover according to Claim 1,
wherein said spring is a torsion coil spring.

8-12. (Cancelled)

13. (Previously Presented) An image reading apparatus comprising:
an original cover as recited in any one of Claims 1, 2, 3, 4, or 7; and
image reading means for reading image information of an original placed on
an original stand.
